## **CERIC – BOARD OF AUDITORS**

### **OPINION ON BUDGET 2019**

Dear Sirs,

We have examined the budget for 2019 and we have verified that it has been drafted by using the same schemes and the same criteria already adopted for the 2018 budget.

The said criteria, in our opinion, are well representative of the revenues to be collected and the costs connected to them. All the items are broken down in order to represent both the nature of the costs and revenues and their destination.

In particular, is well represented among the general expenses, the part of them that must be allocated within the costs (of the same nature) related to projects financed with external funds (EU European Projects).

A relevant component of the 2019 revenues is the carry over deriving from both the 2017 financial statements and the 2018 forecast.

In calculating the carry over it is necessary to take into consideration the component of it that must be maintained for the completion of the depreciation process of the acquired tangible and intangible assets, both those related to the seat activities and those related to the projects.

In the planning process of the commitments to be assumed that have relevance and economic/financial consequences beyond 2019, it is necessary to keep into consideration that in 2019 expires the first five-year period that foresees the permanence of the CERIC seat in Italy. In 2019 budget it is assumed that the annual contribution from Italy, foreseen in the preamble of the commission decision implementing CERIC, will be provided.

From a point of view of compliance with accounting principles there are no remarks on our part, being stated that the approval of the budget regarding its contents is reserved to the General Assembly.
