EOSC Association

List of provisional Members and Observers

CONTEXT

On October 28, the non-statutory Board decided on provisional acceptance of new Members and Observers to be ratified during the First (constitutional) General Assembly.

Part of the decision was to provisionally accept three (3) members and three (3) observers subject to certain conditions, which were duly communicated to the interested organisations. The decision also established November 20 as a deadline for meeting these conditions, as well as for countries to nominate their mandated organisations.

This document is structured as follows:

a. Update on the organizations that were granted the status of "provisional Members subject to conditions"
b. Update on the organizations based in the UK that were granted the status of "provisional Observers subject to their acceptance to this status change"
c. Final list of provisional members, updated according to point (a) above
d. Final list of provisional observers, updated according to point (b) above
e. Final list of provisional members nominated as mandated organisations
f. General statistics: (i) number of organisations by type of membership (full members, including those designated as mandated organizations, and observers); and (ii) by main category.
g. Correction of a material error

a. Update on the organizations that were granted the status of "provisional Members subject to conditions"

Three (3) organizations were granted the status of provisional Members subject to the condition that they sent an unconditional and formal letter of interest aligned with the requirements listed in the Statutes and signed by their legal representative no later than 23:59 local Brussels time on 20 November 2020. If this was not received, then they would not be considered for admission during the first (constitutional) General Assembly.

All three of them, European Molecular Biology Laboratory – EMBL (international organization based in Germany), National Research Institute for Agriculture, Food and Environment – INRAE (France) and Entidad pública empresarial Red.es (Spain) have sent them in due time and therefore have become "provisional Members".

b. Update on the organizations based in the UK that were granted the status of "provisional Observers subject to their acceptance to this status change"

Three (3) organizations based in the UK, which had applied to become members, were granted the status of provisional Observers, subject to their acceptance of this status change no later than 23:59 local Brussels time on 20 November 2020. If this was not received, then they would not be considered for admission during the first (constitutional) General Assembly.

All three of them, Digital Science & Research Solutions Ltd. (DSRSL), Instruct Integrated Structural Biology Infrastructure in Europe (Instruct-ERIC) and Jisc LBG (Jisc) have accepted this status change in due time and therefore have become "provisional Observers".

c. Final list of provisional members, updated according to point (a) above

Research funding organisations	13	7%
Research performing organisations	114	61%
Service providing organisations	57	30%
Other organizations	3	2%
Total	**187**	

g. Correction of a material error

Once the Board' decision of 28 October was communicated to the provisional members and observers, one of them, French research institute for the sustainable development (IRD), noted that there was a divergence between the letter of interest they had sent and the option they had marked in the web application. They recognized an error when entering the data and requested that the letter of interest be accepted as the only valid and that the status be changed to Observer. The lists in points (c) and (d) above show this modification.
